DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 – 2 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Lo et al (2005/0053103).

The applied reference has common inventors with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Regarding claim 1, Lo discloses a tunable laser, comprising: a first tunable element (see Fig. 4, Characters F1 and F2) having a corresponding first error signal; a second tunable element (see Fig. 4, Characters 508 and 510, Paragraphs 0034, and 0035) having a corresponding second error signal; and a controller (see Fig. 4, Character 420, Paragraph 0042) to linearly relate said first error signal and said second error signal to output a first control signal to control said first tunable element and a second control signal to control said second tunable element (see Fig. 4, Paragraphs 0034-35, 0038-39).

Regarding claim 2, Lo discloses a first tunable element comprises at least one temperature tunable filter (see Fig. 4, Character F1 and F2) and said second tunable element comprises temperature controllable (see Fig. 4, Character 508 and 510) cavity length.

Regarding claim 6, Lo discloses a first tunable element comprises a first temperature tunable filter (see Fig. 4, Character F1) and said second tunable element comprises a second temperature tunable filter (see Fig. 4, Character F2).

Allowable Subject Matter

Claims 3 – 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7 – 20 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 7 recites a method for controlling a tunable laser structure including the specific structure limitation of *coupler matrix to linearly relate said plurality of error in said input matrix to said output signals in said output matrix*, which is neither anticipated or disclosed nor suggested in any piece of available prior art, which is neither anticipated nor obvious over the prior art of record.

Claim 16 recites a external cavity tunable laser system structure including the specific structure limitation of a *controller comprising: an input matrix representation of said first filter error signal, said second filter error signal, and said cavity length error signal; an output matrix representation of control signals for said first temperature tunable filter, said second temperature tunable filter, and said temperature controllable sled; and a coupler matrix to linearly relate said plurality of error signals in said input matrix to said output signals in said output matrix*, which is neither anticipated or disclosed nor suggested in any piece of available prior art, which is neither anticipated nor obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
